4. Overview of the Third Quarter Ended December 31, 2005

In Japan, despite a fierce operating environment, demand for hydraulic excavators rose on the back of continued stock adjustments and disaster recovery projects. Combined with the consolidation of TCM Corporation from the second quarter, net sales rose 34.9% to ¥149,087 million.

In the Americas, net sales rose 49.8% to ¥80,502 million as a result of brisk demand for construction machinery that was driven by brisk housing investment, highway repairs and infrastructure restoration projects.

In Europe, Africa and the Middle East, Europe recorded increased sales following expansion of independent sales networks, Africa displayed growth in demand for mining machinery amid bustling resource mining, the Middle East witnessed an increase in infrastructure development and plant construction supported by recycled oil money, and demand rose in Russia amid resource and infrastructure development. Consequently, net sales increased 41.7% to ¥96,931 million.

In Oceania and Asia, demand for hydraulic excavators in the region as a whole was brisk, with continued robust performance for mining machinery particularly in Australia and Indonesia, resulting in a 37.9% rise in net sales to \mathbb{Y}74,722 million.

In China, while demand for hydraulic excavators declined 54% between January and April 2005, compared to the same term last year, from the effects of such macro-economic policies as money-tightening measures of the Chinese government, a rebound occurred in May to produce 60% growth in demand between May and December 2005, compared to the same term last year. Demand continued to rise for mini-excavators in such urban areas as Shanghai, as well as for small 7- and 12-ton-class hydraulic excavators. Net sales edged up 7.5% to ¥36,722 million.

In aggregate, results were roughly on par with fiscal year projections, as consolidated net sales were \$437,964 million, operating income was \$40,409 million, ordinary income was \$32,083 million and net income was \$17,734 million.
