

Hot Slag Application

HITACHI

Reliable solutions

Since 1962 we have served the North American market, formerly as Kawasaki and KCM branded wheel loaders, currently as Hitachi. In 2010 Kawasaki entered into a joint venture with Hitachi Construction Machinery (HCM) — a partnership that successfully combined the technological and manufacturing resources of both companies. Now as a subsidiary of one of the largest construction machinery companies in the world, Hitachi Construction Machinery Loaders America Inc. (HCMA) is securely poised as your go-to source in the North American wheel loader market. HCMA's focus remains on building trust with you, our dealers and customers. From engineering to manufacturing and support, this single-minded focus will keep you running, productive, and profitable. One more way that, every day, Hitachi loaders enable you to meet your deadlines, hit your bottom line, and honor your commitments.

HOT SLAG

HOT SLAG APPLICATION

HCMA developed the Hot Slag Package for this severe application to include special guarding, safety systems, and a cab air filtration system. All systems for this demanding application were developed primarily to prevent damage and injury due to extreme heat, as well as the dusty environment.

The HCMA factory installed Hot Slag Package is available from the ZW370-6 through the ZW550-6.

STANDARD ZW FEATURES

- 12V outlet
- All metal fabrication engine compartment ①
- AM/FM/AUX ⑤
- AutoBrake
- Buckets—rockland hot slag buckets, with hot slag teeth
- F/R switch
- Ground level fueling
- Hydraulic over hydraulic controls
- Rear steel grill ③
- Rearview camera ③
- Reversible fan ③
- Steel fenders ①
- Tires—titan or general L5 slick (26.5 or 29.5) ①

HOT SLAG FEATURES AND OPTIONS

Cab ④

- Blast resisting, tempered glass with laminate film in reinforced retaining frame and e-coat
- Joystick steering, standard on ZW550

Electrical Systems

- Batteries, isolated and insulated ④
- HID lights, high heat resistant
- Wiring harness, high heat resistant ①

Hydraulics

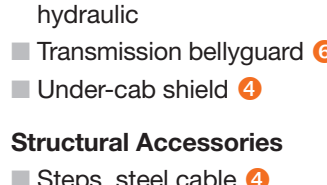

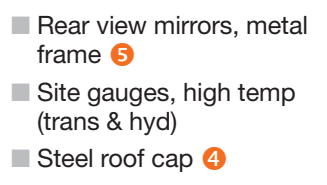

- Ecosafe hydraulic fluid

PowerTrain

- All-aluminum fuel canisters
- Axle brake lines, stainless steel
- Parking brake override
- Remote engine shutdown ③
- Transmission override (F1/R1)

Protection/Guarding

- Battery box guard ④
- Bellyguard, front chassis ⑥
- Cab prefilter ④
- Headlight, steel ②
- Hose package, high heat resistant (artic area guard, steel type) ④
- Hydraulic tank sight gauge guard
- Light Guard, Tail Light

- Rear view mirrors, metal frame ⑤
 - Site gauges, high temp (trans & hyd)
 - Steel roof cap ④
 - Tank guards, fuel, hydraulic
 - Transmission bellyguard ⑥
 - Under-cab shield ④
- ### Structural Accessories
- Steps, steel cable ④
 - Wheel hub studs (I.L.O. bolts)

A FULL LINE OF WHEEL LOADERS

- 13 Models
- 30 HP–531 HP
