

HITACHI

Reliable Solutions

Hitachi **Genuine** Paint

Protect your investment in Hitachi machinery

HITACHI

Reliable Solutions

The exterior of your construction equipment deserves the same care and attention as the high-quality components and technology that lie beneath it. Using Hitachi Genuine Paint ensures the optimum appearance of your machine, which not only creates a positive image for your business, but also contributes to a high resale value.

Approved by Hitachi

- Two-component paint for professional use
- Single-component paint for repairs and maintenance
- High UV resistance
- Protects against corrosion
- Easy to apply
- Approved Hitachi colors
- Exceptional quality

We want to help you protect your investment in your Hitachi construction equipment. So we have produced two paint systems in official Hitachi colors to ensure a consistent and quality finish to your excavator or wheel loader.

Hitachi Genuine Paint is the same high-quality product applied to new machines in our factories. So you won't have to worry about color changes to your equipment

following modifications or repairs. Nor the effects of fading caused by UV light from long days spent on the job site.*

As a Hitachi customer, two options are available. You can take advantage of the two-component Hitachi Genuine Paint via your local Hitachi dealer. Available in a spray can, the paint can be used by professionals for complete repainting or machine touch-ups after modifications.

In addition, a single-component version is ideal for use after repairs and for regular maintenance. It is easy to apply and can be completed quickly and conveniently on site. Not having to transport your machine helps you to maximise its availability.

**Two-component paint offers superior resistance to fading caused by exposure to UV rays.*

Hitachi Genuine Paint (two-component)
